1. Introduction

SPMSpeak.ai is a mobile-first web app that lets Malaysian secondary school students rehearse the SPM English Speaking Test and receive instant, examiner-style feedback. Students speak into their phone, the app transcribes the recording and an AI examiner grades it against the four official SPM Speaking criteria.

What students get

- Authentic SPM-style speaking tasks with real timing and preparation windows.
- A score out of 24, a band, an estimated CEFR level and written feedback within about a minute.
- Strengths and improvement points quoted from what they actually said.
- A full practice history so progress over time is visible.

What teachers get

- A dashboard of every student they have added, with latest score, CEFR level and activity status.
- Classes, so a form teacher can separate 4 As-Syafie from 5 Al-Ghazali.
- Class reports with averages, CEFR distribution and AI recommendations, printable or downloadable as PDF.
- Individual student profiles with full assessment history and downloadable reports.

Devices

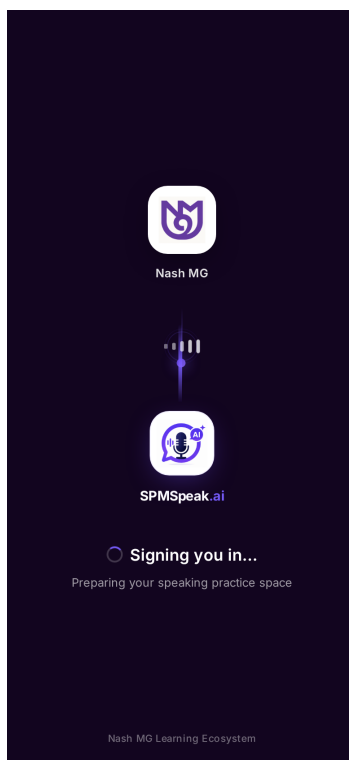

SPMSpeak.ai runs in any modern browser on phone, tablet, laptop or desktop. The screenshots in this manual were taken on a phone-sized screen; on a larger screen the same content is used with more horizontal space. A microphone is required, and the browser will ask for permission the first time a student records.

2. Signing in with your Nash MG Account

SPMSpeak.ai is part of the Nash MG Learning Ecosystem. Your Nash MG Account is the single source of truth for your full name, school and email address.

Coming from Nash MG

When you open SPMSpeak from Nash MG you are signed in automatically. A short transition screen appears while your account is connected; no password is needed.

The Nash MG to SPMSpeak.ai sign-in transition

Signing in directly

If you open SPMSpeak.ai directly you will see the sign-in screen. Enter the email and password of your account, or tap Create an account if you are new. Forgot Password sends a reset link to your email.

Welcome back

Sign in to continue your SPM Speaking practice.

Creating a new account

Important: your name, school and email cannot be edited inside SPMSpeak. Change them in your Nash MG Account and SPMSpeak will pick up the change the next time you open or refresh

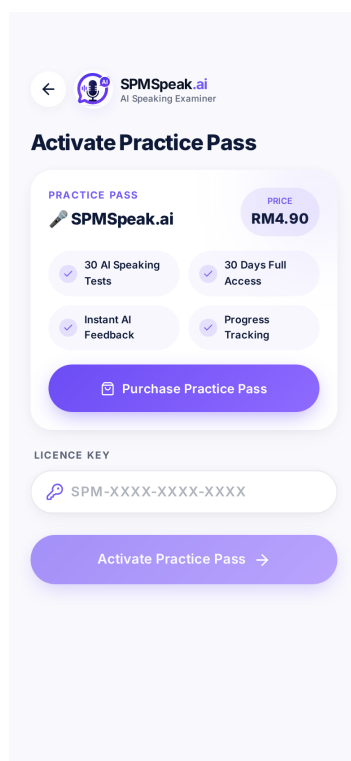

the app.

3. Practice Passes

Every AI-graded speaking test uses one Practice Pass attempt. A pass gives 30 AI speaking tests and stays valid for 90 days from the day it is activated.

Activating a pass

- Open the app and go to the activation screen (it appears automatically if you have no active pass).
- Type the licence key exactly as you received it, in the format SPM-XXXX-XXXX-XXXX.
- Tap Activate Practice Pass. A confirmation appears and your 90-day access starts immediately.
- No key yet? Tap Purchase Practice Pass to buy one.

The Activate Practice Pass screen

Checking what is left

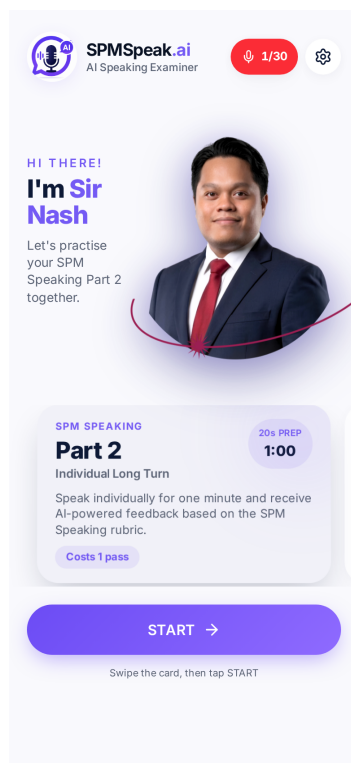

The red badge at the top of the home screen shows the attempts remaining out of 30. Tap it to see the pass code, the expiry date and the number of tests used.

When an attempt is used

An attempt is deducted only when the AI evaluation succeeds. If the recording cannot be transcribed or the evaluation fails, the app says clearly that no test was deducted, and the student can try again.

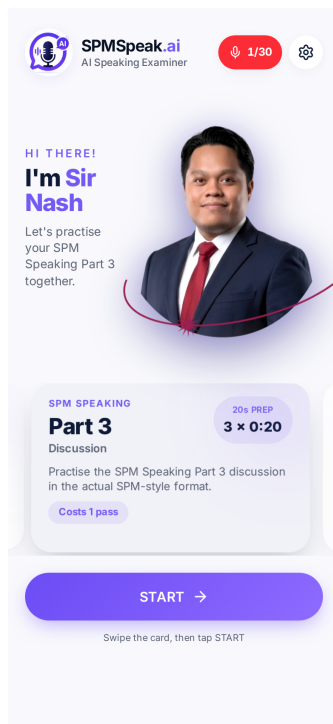

4. The home screen and the four practice modes

The home screen greets the student, shows the remaining attempts and presents a swipeable carousel of practice modes. Swipe the card left or right (or use the arrows on desktop) and then tap START. The greeting under "I'm Sir Nash" changes with the selected card.

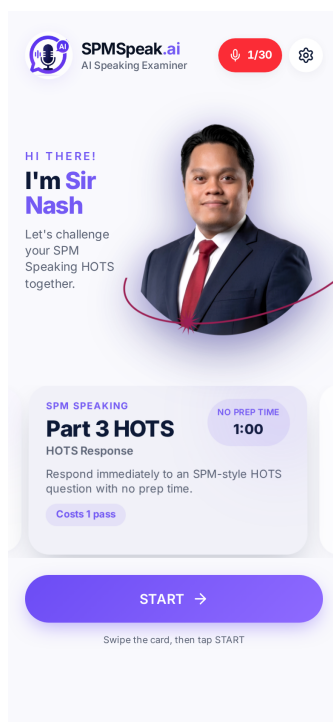

Part 2 selected on the home carousel

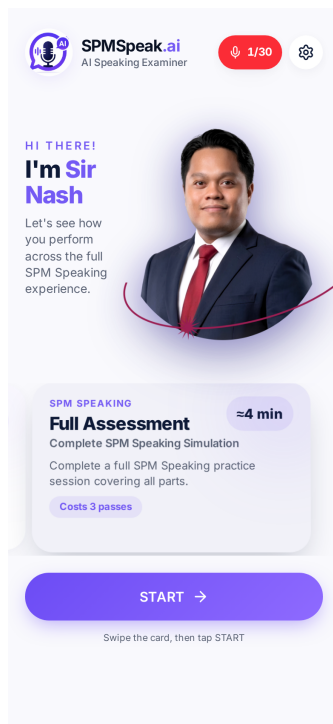

Mode	Format	Prep	Speaking time	Cost
Part 2 · Individual Long Turn	One long turn on a task card	20 s	1:00	1 pass
Part 3 · Discussion	Three prompts in SPM discussion format	20 s	3 × 0:20	1 pass
Part 3 HOTS	One higher-order thinking question	None	1:00	1 pass
Full Assessment	Part 1 introduction, Part 2, Part 3 and HOTS in sequence	Per part	≈4 min	3 passes

Part 3 Discussion

Part 3 HOTS, answered immediately with no preparation time

Full Assessment, a complete simulation costing three passes

Questions are chosen so that a student does not see the same task again until the whole question pool has been used.

5. Doing a practice test, step by step

Step 1 • Preparation

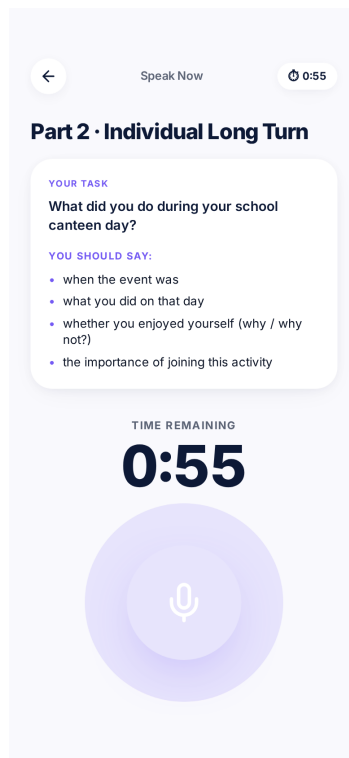

The task card appears with the question and the bullet points that must be covered. A countdown ring shows the preparation time. Plan the key points and useful vocabulary; tap Skip Timer to begin early.

Preparation screen with the task card and countdown

Step 2 • Speaking

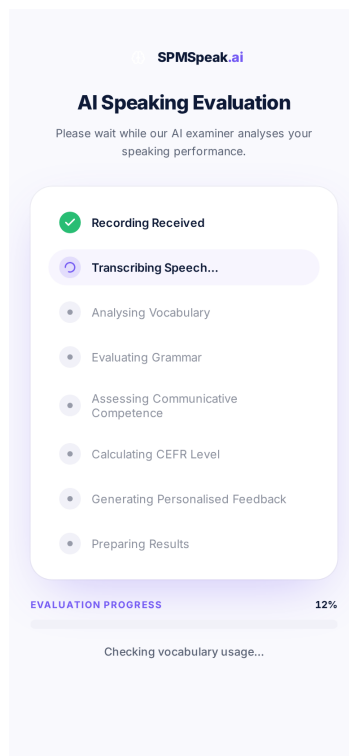

Recording starts automatically and the question stays on screen the whole time so nothing is forgotten. The timer counts down and the microphone circle pulses while your voice is captured. Speak clearly, cover every bullet, and aim for roughly 120 to 160 words in Part 2.

Recording screen with the task visible throughout

Step 3 • AI evaluation

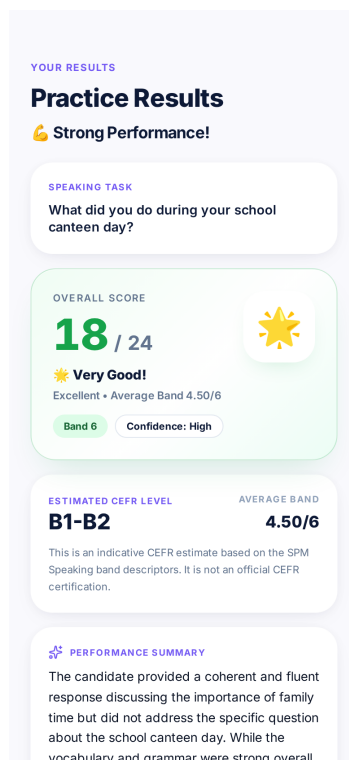

When the time is up the recording is transcribed and graded. The progress list shows each stage of the analysis. This normally takes under a minute; keep the screen open.

The AI evaluation progress screen

6. Understanding your results

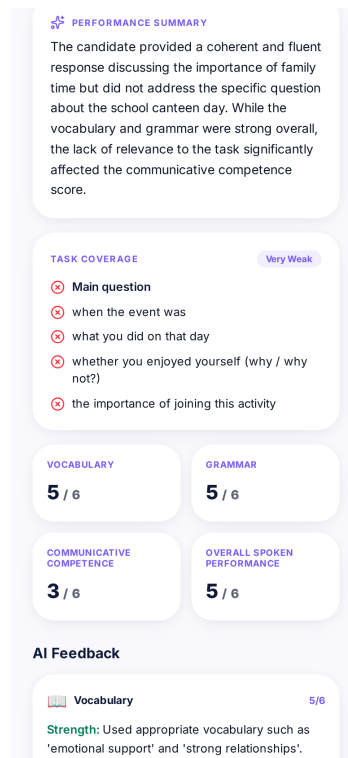

The results screen opens with the overall score out of 24, the band, an encouraging headline and a confidence indicator, followed by the estimated CEFR level.

Overall score, band and estimated CEFR level

Performance summary and task coverage

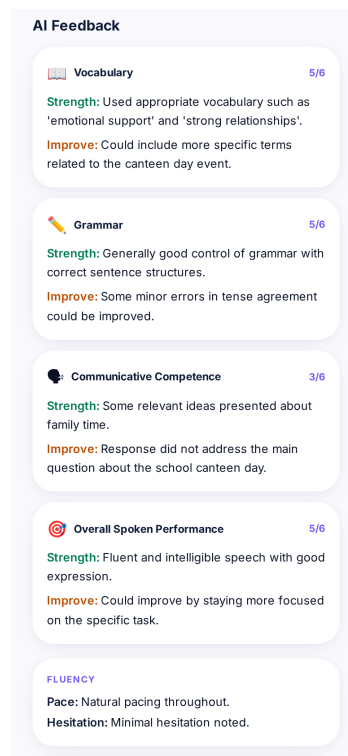

The summary explains in one paragraph how the response was judged. Task coverage lists the main question and every bullet on the task card with a tick or a cross, which makes it obvious when an answer drifted off the topic. The example below scored only 10/24 because the speaker talked about family time instead of the school canteen day.

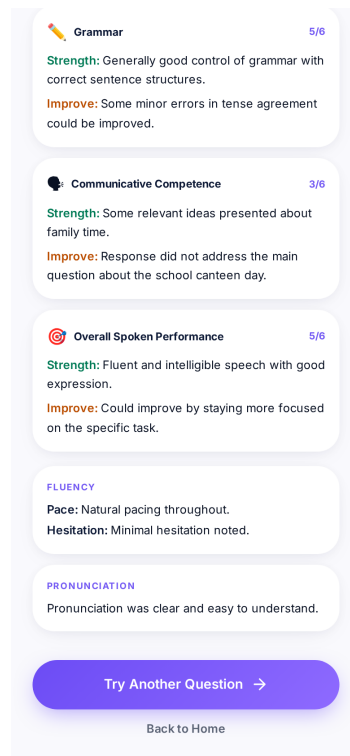

Performance summary, task coverage and the four criterion scores

AI feedback per criterion

Each of the four criteria gets a score out of 6 with one strength and one improvement point, quoted from what was actually said. Fluency and pronunciation notes follow.

Criterion-by-criterion feedback

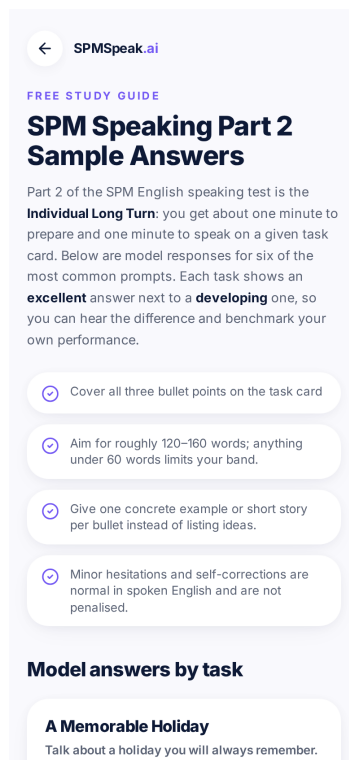

Fluency and pronunciation notes, then Try Another Question

Tap Try Another Question to practise again with a new task (this uses another attempt), or Back to Home.

7. Free sample answers

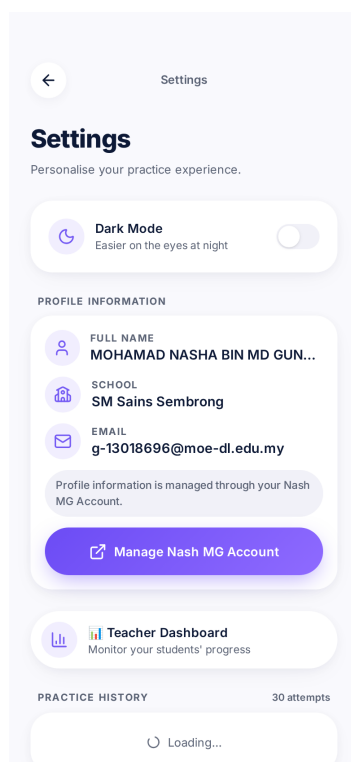

The sample answers page is a free study guide that needs no Practice Pass. For each common Part 2 task it shows an excellent answer next to a developing one so students can hear the difference and benchmark themselves.

The free SPM Speaking Part 2 sample answers guide

8. Settings and practice history

Settings holds the dark mode switch, the read-only profile from Nash MG, the Teacher Dashboard button for teacher accounts, and the full practice history.

Settings, with profile details managed by Nash MG

Practice history lists every attempt with its score and estimated CEFR level, newest first, so improvement over the 90 days is easy to see.

9. Teacher Dashboard

Accounts whose email begins with g- are recognised as teacher accounts. They see a Teacher Dashboard button in Settings. The dashboard monitors only the students the teacher has added.

Teacher Dashboard: class tabs, class management and summary cards

Summary cards

- **Total students** — students in the selected class, or all students.
- **Average score** — mean latest score out of 24.
- **Average CEFR** — mean estimated CEFR level of the group.
- **Active passes** — how many students currently hold a valid pass.

Adding students

Add one student by typing the email and tapping Add Student, or open the bulk import box and paste one email per line. Duplicates and invalid addresses are skipped automatically.

10. Classes, class reports and student profiles

Managing classes

Create a class by typing its name and tapping the plus button. Use the pencil to rename and the bin to delete; deleting a class keeps every student and their records, moving them to Unassigned. Each student row has a class dropdown, and selected students can be moved together.

Student rows with score, CEFR level, activity, class and report actions

Class report

Tap Generate Class Report to open a report for the selected class: students, active passes, average score, average CEFR, average attempts, the strongest criterion, progress bars, CEFR distribution and AI recommendations. It can be printed or downloaded as a PDF for records or parent meetings.

The class report

Student profile

Tap a student's name to open their profile: pass status, attempts left, passes activated, total attempts, latest, highest and average score, latest CEFR level, and the full assessment history with a downloadable report for each attempt.

An individual student profile

11. Scoring reference

Every graded response is marked on four criteria, each out of 6, giving a total out of 24. The AI examiner marks holistically, in the way a real SPM examiner does: minor hesitations and self-corrections are normal in speech and are not penalised.

Criterion	What it rewards
Vocabulary	Range and accuracy of words and expressions used naturally in context.
Grammar	Control of structures and tenses across the whole response.
Communicative Competence	Answering the actual question, covering the bullets, developing ideas.
Overall Spoken Performance	Fluency, intelligibility, pacing and overall effect on the listener.

How to score well

- Answer the question that was asked; drifting off topic costs the most marks.
- Cover every bullet on the task card, one clear example each.
- Aim for about 120 to 160 words in a one-minute turn; under 60 words limits the band.
- Keep to English; heavy use of Malay reduces the score.
- Speak at a natural pace and finish with a short conclusion.

Band boundaries

Total score	Band
20 – 24	Band 6
14 – 19	Band 5 / 4
9 – 13	Band 3
0 – 8	Band 2 / 1

Estimated CEFR level

The average band is the total score divided by four. The estimate is indicative, based on the SPM Speaking band descriptors; it is not an official CEFR certification.

Average band	Estimated CEFR
0 - 1	Below A2
1 - 2	A2
2 - 3	A2 - B1
3 - 4	B1
4 - 5	B1 - B2
5 - 6	B2
6	C1

12. Troubleshooting and FAQ

Problem	What to do
The microphone does not record	Allow microphone access when the browser asks, close other apps using the microphone and reload the page.
"Unable to complete the evaluation"	Check the internet connection and tap Try Again. No attempt is deducted when an evaluation fails.
My name or school is wrong	Update it in your Nash MG Account at nashmg.com/settings , then reopen SPMSpeak; it refreshes automatically.
The badge shows 0/30	All 30 tests have been used. Activate a new Practice Pass to continue.
My pass has expired	Passes last 90 days from activation. Activate a new key.
A student is missing from my dashboard	Add the student by email; the address must match the one they use to sign in.
A student shows no score	They have not completed a graded attempt yet, or their pass is not yet activated.
I cannot edit my profile in Settings	This is intentional. Nash MG is the single source of truth for name, school and email.

Quick reference

Item	Value
Practice Pass	30 AI speaking tests, valid 90 days from activation
Cost per test	1 attempt (Full Assessment: 3 attempts)
Score range	0 - 24 across four criteria of 6
